LinkedIn | GitHub | Portfolio

As an experienced MERN stack web developer, my career objective is to further enhance my expertise and pursue my passion for building high-quality and user-friendly web applications. My goal is to contribute my technical skills, creative design thinking, and meticulous attention to detail to a dynamic and collaborative development team.

TECHNICAL SKILLS

- **Expertise:** HTML | CSS | Bootstrap | Tailwind | JavaScript | ES6 | React | MongoDB
- **Comfortable:** Firebase Authentication | REST APIs | ExpressJS | JWT | React Router
- **Familiar:** Node, Stripe Payment
- **Programming Language:** JavaScript
- **Tools:** Git And GitHub | Postman | npm | Chrome Dev Tools | Visual Studio Code | Vercel

SOFT SKILLS

- Communication | Teamwork and collaboration | Adaptability | Time management

PROJECTS

PHONETICS | ONLINE LEARNING PLATFORM PROJECT | JUNE 2023 | 5 DAYS
Live link | GitHub> Client | Server

KEY FEATURES

- **Approval:** Any instructor after adding a course needs approval from admin to make listed that course. Admin can deny also.
- **Payment system:** After choosing a class it will be stored on Cart, Anytime a student can pay for the course and get the access to course from the My Enrolled Classes page.
- **Available Seats:** If any student enrolled a course, everybody can see the available seats real-time. If Seats are zero, the course will be locked.

Used Technologies: React Js | Stripe | React router | Axios | TanStack

LEGENDS | TOY-MARKETPLACE PROJECT | MAY 2023 | 6 DAYS
Live link | GitHub> Client | Server

KEY FEATURES

- **Image Gallery:** The website features an image gallery that showcases a visually appealing display of toys, allowing users to get a glimpse of the available products.
- **Shop by Category:** Users can conveniently browse through the toy collection by exploring the category tabs. This feature enables them to find toys based on their preferred categories.
- **Seller Control:** Seller can control his added product after adding. Name, Stock quantity, and Description can be modified by the seller.

Used Technologies: React Js | React Tab | AOS | Tailwind | MongoDb
